EXPERIENCE

Pixel Forge Studios — Springfield, USA
Senior Gameplay Designer | *Robo Racers (Unity)* — Jan 2022 – Present

- Designed the boost and drafting system, balancing catch-up help for trailing racers against rewards for skilled racing lines, and tuned it across all 30 tracks
- Designed the opponent AI difficulty tiers
- Set up a weekly playtest loop with QA and turned each round of findings into a tuning pass
- Ran weekly live events with rotating track modifiers, and used retention and completion data to decide which modifiers and rewards came back
- Led design for the ranked multiplayer mode from prototype through launch, including matchmaking rules, seasons, and rank rewards

Lantern Games — Shelbyville, USA
Gameplay Designer, Combat Team | *Dungeon Delvers (Unreal Engine 4)* — Jun 2019 – Dec 2021

- Designed and scripted two boss encounters whose phases change with how well the party is doing, so a struggling group gets breathing room and a strong one gets pushed
- Owned the design and scripting of six enemy types in Blueprints
- Built and balanced twelve player abilities in data tables with the systems designer, tuning cooldowns and damage so each class had a clear role in a party
- Scaled enemy health, damage, and spawn counts for one to four players, and tested every party size at each milestone so solo play never felt like an afterthought

Fox Den Interactive — Springfield, USA
Associate Designer | *Pocket Golf (Unity)* — Jun 2017 – May 2019

- Designed and scripted 40 courses across four seasonal updates
- Tuned ball physics and wind so shots read clearly on a small screen

SKILLS

Software: Unreal Engine 4/5, Unity, C#, C++, Perforce
Design: Combat Design, Enemy Design, Systems Design, Balancing, Prototyping, Playtesting, Live Events
Production: Jira, Confluence, Git, Miro
Platforms: PC, PS5, iOS/Android

PROJECTS

Sample Side Project — example.com/side-project
A small puzzle game built in a weekend.

- Built a time-rewind mechanic that records every object's state, so any puzzle can be undone step by step
- Released to itch.io and used for playtesting new puzzle ideas

EDUCATION

Example State University — 2013 – 2017
B.S. Computer Science — Springfield, USA
